

**Together, we can
end the culture of
terrorism and war, &
co-create a culture of
peace that will last
for the longest time!**

The VISION 2020 emblem is a modern interpretation of an ancient prediction that says, 'nations will not learn war any more'. This can be the decade for people everywhere to unite in peace and make this prediction actualise. Everyone can now learn and practice earth repair through permaculture* and also how to live long, healthy, happy, loving and peaceful lives. Permaculture ethics are, People Care, Earth Care, Fair Share.

Everyone is invited to participate in the ongoing and achievable quest for our Earth to become sustainable and Greener.

By helping to plant and organically grow an abundance of permaculture designed food forests in all appropriate places possible, unlimited ethical and honourable employment can be created enabling food security and plenty of fresh healthy living foods for everyone.

This worldwide quest is achievable within this decade by increasing numbers of people being mentored in the practice of permaculture life-skills in homes and school yards, apartment balconys, community gardens, rural lands, juvenile and refugee detention centres, rehabilitation and corrective services facilities, and prisons.

Part of Vision 2020 is for all currently wasted and continuously available bio-degradable materials to be composted into humus-rich soil via hygienic, aerobic, no-dig, earth repair composting bins made from 100% recycled used plastics.

This humus-soil is then used to help grow increasing numbers of garden food forests to help mitigate and reverse climate change, enhance local and global co-operation in building valuable natural resources, and ending world hunger.

The vision is a world community of caring and sharing people enjoying fun-work and living in freedom, peace and sustainable abundance.

**permaculture = permanent culture + agriculture. To learn more about the valuable contribution that permaculture is making to help humanity thrive, look it up on Wikipedia or browse permaculture.org.au*

"Planting and helping grow increasing quantities of appropriate trees is the scientific solution to Earth's environmental dilemma". Dr Richard St Barbe Baker, Founder, Children of the Green Earth, 1889-1982
