

Let us co-create a culture of world peace that will end war and famine for all time

This VISION 2020 emblem is a modern interpretation of an ancient prediction that says: 'nations will not learn war any more'. Let this be the time for people everywhere to unite in peace and make this prediction actual. Everyone can now learn and practice the principles of permaculture* and how to live long, healthy, happy, loving and peaceful lives. Permaculture ethics are, Earth Care, People Care, Fair Share.

"Planting and helping grow increasing quantities of appropriate trees is the scientific solution to Earth's environmental dilemma". Dr Richard St Barbe Baker, Founder, Children of the Green Earth, 1889-1982

Everyone is invited to participate in this ongoing and achievable quest for all nations to transition from an unsustainable military economy towards our Earth becoming fully self-sustaining. With a realistic global vision, people and humanity will thrive.

By planting and helping grow an abundance of permaculture designed food-forests, together we can create ethical, honourable and practical employment whilst providing an abundance of fresh healthy living foods for everyone.

This world-wide quest is achievable within a decade, by increasing numbers of people learning permaculture principles and ethics, and implementing practical life-enhancing skills in all areas of life.

Vision 2020 motivates for all continuously available and appropriate, bio-degradable materials to be composted via hygienic, aerobic, no-dig, earth-repair composting bins made from 100% recycled plastics.

This will enable the breeding of increasing numbers of Earth Worms and massive amounts of organic humus-soil, to be used in helping nature organically grow forest-food gardens in home-yards and all other appropriate places throughout the world. Enough people doing this will help mitigate and reverse climate change, enhance local and global co-operation, and create valuable natural resources to end hunger.

The vision is for a world community of caring and sharing people, working and living in good health, peace and sustainable abundance.

**permaculture = permanent culture + agriculture. It's a social design science that is already helping humanity to thrive. Learn more now by browsing through the hundreds of pages of picture stories and videos at <https://permaculturenews.org>*
