

# Let us co-create a culture of world peace that will end war and famine for all time

This VISION 2020 emblem is a modern interpretation of an ancient prediction that says: 'nations will not learn war any more'. Let this be the time for people everywhere to unite in peace and make this prediction real. Everyone can now learn and practice the principles of permaculture\* and how to live long, healthy, happy, loving and peaceful lives. Permaculture ethics are, Earth Care, People Care, Fair Share.

*"Planting and helping grow increasing quantities of appropriate trees is the scientific solution to Earth's environmental dilemma". Dr Richard St Barbe Baker, Founder, Children of the Green Earth, 1889-1982*

Everyone is invited to participate in this ongoing and achievable quest for all nations to transition from an unsustainable military economy towards our Earth becoming fully self-sustaining.

By planting and helping grow an abundance of permaculture designed food-forests, together we can create ethical, honourable and practical employment whilst providing an abundance of fresh foods for all.

This world-wide quest is achievable within a decade by increasing numbers of people learning permaculture principles and ethics, and implementing practical life-enhancing skills in all areas of life.

Vision 2020 motivates for all continuously available compostable materials to be processed via hygienic, aerobic, no-dig, earth-repair composting bins made from 100% recycled plastics, to breed increasing numbers of earth worms and massive amounts of organic humus-soil.

This humus soil is then used to help nature organically grow food gardens in home-yards throughout the world. Enough people doing this will help mitigate and reverse climate change, enhance local and global co-operation, and build valuable natural resources to end hunger.

The vision is for a world community of caring and sharing people, working and living in good health, peace and sustainable abundance.

*\*permaculture = permanent culture + agriculture. It's a social design science that is helping humanity thrive. Learn more now by browsing through the hundreds of pages of picture stories and videos at <https://permaculturenews.org>*
