

**An ancient prophecy says:
'Nations will not learn war any more'.**

Let this be the time for people everywhere to unite for peace and make this prophesy an actual reality. Now nations can learn and practice the principles of permaculture and how all citizens can live long, healthy, happy, loving and peaceful lives. Permaculture ethics are, Earth Care, People Care, Fair Share.

As adoption of the [Global Earth Repair Solution Strategy Charter](#) self-perpetuates, there will be an abundance of funding available by transitioning from wasteful annual military budgets of over \$3 Trillion dollars (that's 3 thousand billion dollars a year) to invest into funding the achievable solutions on the following list.

The transition will include engaging personnel, resources and expertise from all national military service sectors to implement Global Earth Repair projects in co-operation with the World's people, communities and nations, to help solve our planet's environmental climate crisis.

~ GLOBAL EARTH REPAIR PROJECTS ~

1. The 1st Global Earth Repair Conference was held in the USA in May 2019; help fund these conferences in every nation;
2. Purify and regenerate the land, seas, lakes and rivers;
3. Provide safe clean water for all
by creating large-scale solar and renewable-energy powered desalination plants and pumping stations in strategic locations throughout the world, then piping the purified water to arid areas; this will enable garden food-forests to be growing in increasing abundance to end hunger and unemployment once and for all;
4. Compost all the continuously available bio-degradable materials to create increasing volumes of humus-rich soil and breed increasing numbers of Earth Worms at the same time. This will help replenish the Earth's top-soils;
5. Recycle plastics to make increasing numbers of hygienic, aerobic, no-dig, composting bins for every home yard so all bio-degradable resources can be returned to the Earth as humus;
6. Implement the learning of permaculture ethics & principles in every school towards ending hunger & under employment;
7. Establish productive permaculture food-forests in as many home yards and other appropriate communal places;
8. Supersede using toxic fertilisers for organic methods in the growing of all food crops including cotton & hemp for fibre;
9. Treat sewage to make compost to help trees grow;
*"Planting and helping grow increasing quantities of appropriate trees, is the scientific solution to Earth's environmental dilemma."
Dr Richard St Barbe Baker, Founder 'Children of the Green Earth';*
10. Fund the International Rights of Nature movement;

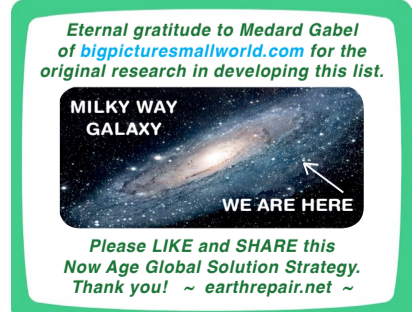

11. Protect in perpetuity all remaining high conservation value native forests and conserve all vital bio-diversity;
12. Accelerate appropriate mixed-species plantation forestry;
13. Provide free universal education and health-care for all people;
14. Teach everyone the wisdom of Hippocrates who taught "Let your food be your medicine".
15. Show all how to acquire good health & immunity efficiency;
16. End malnutrition & starvation, & also over-eating & obesity;
17. Implement an International Bill of Human Rights;
18. Recognise Sovereignty Treaty Rights for all Indigenous Nations and Peoples by giving a fair share of the profits taken from their traditional and sacred lands; and ensure their full representation in all United Nations Forums;
19. End homelessness world-wide by helping provide sustainable shelter for all;
20. Implement only 'new-clean' renewable energy systems based on the 'World's Best Practices';
21. Replace 'opposition party' politics with 'collaboration party' politics in all governments; true democracy is having referendums on decisions that will affect everyone;
22. Provide free family planning, and birthing and parenting advice for a stable growth in our world's population;
23. Retire developing nation's debts;
24. Educate to end racial and religious tensions by recognising our one humanity and Earth as the common home for all people, all citizens of the infinite universe;
25. Reverse further global warming and ozone depletion;
26. Solve public concerns about chem-trails, fluoridated water, mandatory vaccinations, and unnecessary abortions;
27. Replace single use plastics with non-polluting alternatives;
28. Disarm nuclear weapons and ban all weapons of mass-destruction; eradicate all land mines;
29. Educate to end self-harm & suicide by implementing drug abuse control strategies on tobacco and alcohol use;
30. Educate to recognise the equality of species and gender;
31. Establish a Department or Ministry for Peace in every government and educate to end domestic and all violence;
32. Reveal how Heaven, Nirvana, Samadhi and Satori are within everyone's potential for immediate access by all people learning Optimism NOWwww Peace Meditation;
33. Declare Inner and World peace for everyone for all time.

Be part of the solution with this Thought-Seeding initiative.

Please share it with community leaders, politicians, the media, and family and friends. Thank you!

BELIEVE IT and ACHIEVE IT
