

A GLOBAL PETITION for a Department or Ministry for Peace in Every Government

There is an urgent need to peacefully resolve conflicts that exist among ourselves, within our regions, countries and the world.

Therefore we respectfully ask every government to legislate to establish a Ministry or Department for Peace to achieve the following:

- research, gather, analyse and utilise information and recommendations from local and global peace organisations;
- create policies that assist how to attain and maintain peace at all levels of society, personal, domestic, regional, state, federal and global;
- support and influence the already existing global movement for every nation to establish a Ministry or Department for Peace;
- encourage global communities to observe and celebrate all endeavours for peace on a personal, local, national and international level;
- administer Peace Academies as government initiatives to teach world's best practice in creative mediation and conflict resolution methods, to enable peacemakers to work among domestic and international populations;
- finance the development of educational programs for civilian peacekeepers in schools, universities, the military, and among conflicting cultures everywhere;
- provide prevention and healing programs addressing domestic, gang, drug, alcohol and gambling related violence towards a world-wide culture of lasting inner and world peace.

Please participate in this global thought-seeding campaign by petitioning and networking this proposal with your local, state and national political leaders.

We ask you to print this page and write a friendly, positive supportive letter on the reverse side to give or send to your local politicians.

If you are able to help by starting an online Petition to network this proposal globally, that would be awesome. Thank you.
