An Ancient Prophecy says: 'Nations will not learn war any more'. Now nations can practice permaculture and help grow herbs and veggies, nuts and fruits, using home-made compost on the roots!

"Plant food~forests, clean the air, save old forests everywhere! Peoples of the world unite. Feed the hungry, make it right. Lay down weapons, live in peace ~ let the global conflicts cease."

"A love~filled world is what we need, we can all help sow the seeds. Get the feeling, join the movement, Earth Repair for World Improvement." Let's have an international food and tree growing race instead of an arms race!

May humanity realise its full potential so everyone enjoys INNER and WORLD PEACE.

We the People sharing this declare:

- We **REALISE** every single one of us is a unique, original, self-chosen, great champion winner of life, as at our conception, we each won the chance to have a human experience ahead of millions of competitors; *See YouTube: The Great Sperm Race;*

- We **INVITE** humanity to unite and be one in the collective awakening to the highest awareness of conscious enlightenment;

- We **RECOGNISE** ourselves first as sovereign spiritual citizens of Earth, each and every one of us born free and equal in dignity and human rights;

- We **FIND** our true home in the here and the now, connecting with the sacred soul consciousness we are all inlets to;

- We **BREATHE** deeply, and befriend our in-breaths and out-breaths, and meditate leaving all thoughts of past and future aside, awakening to great personal power in unlimited soul consciousness;

- We **UNDERSTAND** that by consciously living in the cosmos, the cosmos is living within us; experienced like a falling raindrop splashing into the ocean and instantly becoming the ocean;

- We **MAINTAIN** an attitude of gratitude and optimism, turning difficulties into opportunities and problems into solutions, while enjoying the latest moments as our best time so far;

- We **PARTICIPATE** in the movement for world improvement by helping promote an international food and tree growing race that inspires, educates and motivates earth repair actions among all present and future generations;
