

Mission Statement for the Earth Repair Foundation ~ ERF

The Earth Repair Foundation is an independent, self-funded, voluntary, non-government organisation (NGO) that was incorporated in Sydney Australia in 1987. ERF contributes to the global earth repair movement for community advancement and world improvement.

- **The Earth Repair Foundation:**

- **Motivates** for world-wide adoption of the **Earth Repair Charter Global Solution Strategy** and **Vision 2030** to increasingly become the most prominent theme to create a Decade of Peace - 2021 ~ 2030;

- **Aspires** to prompt people everywhere to learn about and adopt the world's best practices, to help implement a global food and tree growing race, instead of an arms race, for a sustainable and peaceful 21st Century;

- **Promotes** for eco-villages to progressively emerge from within the suburbs of towns and cities around the world, to help grow permaculture designed food-forests in home gardens everywhere;

- **Developed** a comprehensive 'Back From The Future' Movie Outline (2030) designed to inspire, educate and motivate all present and future generations;

- **Invites** artists and partners to help complete and distribute a proposed multi-language **Sustainability Learning Poster** for every educational institution;

- **Prompts** people everywhere to regularly consume nutrient-dense foods and drinks to acquire good health and immunity efficiency;

- **Welcomes** donations to help keep this work alive and continuing, and we thank you in advance for your support;

- **ERF** represents Earth Repair First, Earth Repair Family, Earth Repair Friends, Earth Repair Funds, Earth Repair Festivals and Earth Repair for a Fabulous Future.

Earth Repair Foundation

ERF is motivating for world-wide adoption of the Earth Repair Charter Global Solution Strategy to be one of the most prominent themes for this latest Decade on Earth ~ 2021~2030.

Volunteers at Team ERF offer these thought-seeds for achievable solutions.

Vision 2030 for a Decade of Peace

When enough people lead our leaders will follow!

ERF's primary mission is to inspire, educate and motivate present and future generations, towards a safer, healthier and more sustainable world. Our aim is to help people realise we are all related, and co-operation and peace is the natural order of life for everyone.

The essence of these pages to which incalculable research, development and intelligence has been invested, will help enable increasing numbers of people to participate in practical actions for community advancement and world improvement.

The [Earth Repair Charter Global Solution Strategy](#) is from the people, for the people, and is the primary manifesto of the earth repair movement. After wide consultation over decades, numerous achievable solutions have been carefully defined. The Charter has been endorsed by many eminent leaders from around the world summarising the true value of this potentially-historic document.

Endorsements can be read at earthrepair.net and everyone is invited and encouraged to read, absorb, adopt and network the Charter.

If you find some or all of these ideas inspiring and useful, please promote them with friends, family, community and religious leaders, and on social and main stream media networks.

“What The World Needs Now is A Sense of Humus”.

Click to see a short video on composting in recycled plastic bins and hear the Sense of Humus song.

<https://youtu.be/V7VVRPdT7o0>

A primary element of the earth repair movement is home-yard composting and organic permaculture food-gardening, to help ensure food security for present and future generations. It will also enable the practise of hygienic, aerobic no-dig, composting in highly-efficient compost bins made from 100% recycled plastics.

Abundant eco-villages are encouraged to increasingly grow within suburban areas of towns and cities in each nation around the world to help mitigate global warming.

By adopting the minimum-maintenance, maximum-yield principles and ethics of permaculture, which shows how to co-operate with the sun, the earth, the wind and the rain, this will become one of the world's most honourable and ethical employment systems.

Large scale soil production can also be enabled, by recycling and composting all currently-wasted bio-degradable resources, including best-practise in using treated sewage to help grow increasing numbers of appropriate trees.
